Mason's Story | Metal Fabrication

Mason always knew what he wanted to do in the future and was quick to grab the opportunity to complete his schooling and begin a trade at the same time.

Mason saw the opportunity to enrol at SchoolTech and took it with both hands. SchoolTech gave Mason the opportunity to complete Year 12 and also start working in the metal fabrication industry. During Year 11 and 12, Mason was doing work experience when he began his school-based apprenticeship. "I was hoping that if I worked hard enough I'd be offered an apprenticeship, but also complete Year 12."

SchoolTech and Skill360 Australia helped Mason to transition into a full-time apprenticeship as a Boilermaker after the successful completion of Year 12.

"To me, enrolling at SchoolTech is the best way of completing Year 12 as well as getting an apprenticeship. The teachers at SchoolTech strive to help you succeed at getting your Year 12 Certificate and also setting you up for the future in the trade industry."
